

A photograph of a modern dining room. The room features several tables with red upholstered chairs. The tables are set with white plates, silverware, and blue glassware. In the background, there is a grey sofa and a table with decorative green objects. The room has large windows with wooden frames and a light-colored wooden floor.

Welcome to Pergo – the inventor of laminate flooring

We've been in the business of designing durability for more than 30 years. We know the importance of beautiful, practical flooring better than most, and we love the thrill of a new challenge. Over the years, innovative thinking has broadened our portfolio to include wood parquet as well as vinyl flooring solutions. Today we are proud to offer one of the most comprehensive product ranges for residential and commercial projects worldwide.

Flooring runs in the family

In 2012 Pergo joined forces with UNILIN and became a part of Mohawk Industries. Mohawk is the world's leading producer and distributor of quality commercial flooring, with a heritage of craftsmanship that spans more than 130 years.

As a part of Mohawk Industries and UNILIN, Pergo has the reach and resources to take commercial projects from dreams to reality, as a reliable partner on a global scale, while still focussing on the signature innovation, performance and durability that has built the Pergo brand.

* Information sur le niveau d'émission de substances volatiles dans l'air intérieur, présentant un risque de toxicité par inhalation, sur une échelle de classe allant de A+ (très faibles émissions) à C (fortes émissions).

Durability for the long run

Caring for the environment has always played a central role in everything we do. As a testament to our efforts, Pergo was the first flooring manufacturer ever to achieve the official Nordic Ecolabel, the Green Swan.

Through our parent company UNILIN, Pergo flooring is also the first to receive the European Ecolabel for laminate flooring, along with other certificates and quality requirements

The making of a true original

To create Pergo floors, our designers find inspiration in the latest fashion trends, architectural masterpieces and everyday life.

Every floor – whether it's laminate, wood parquet, or vinyl – starts with a vision, backed by careful research and technical development.

Moving into the next phase, we have market-leading technology, state-of-the-art production facilities and over 550 patents and pending applications at our disposal, turning our vision into beautiful, durable flooring.

Research and development

Pergo took its beginnings by inventing a brand new flooring category, the laminate floor. And we never left the drawing board. Whether it's a new click system to speed up installation (PerfectFold™), an all-in-one multi purpose profile (Incizio®) or a protective surface layer (TitanX™ and TitanV™), we're always on the lookout for the next development. Because we know that by moving forward is the only way to deliver the quality you expect from Pergo.

The challenge of water

In making our floors, we always look for the everyday challenge. That's why we recognise the need for all our floors to resist water, regardless of design or material. Whether it is by using waterproof materials like vinyl, inventing groundbreaking new technology to create water-resistant laminate flooring – or making our wood parquet floors moisture resistant and easy to clean. Because accidents will happen and when they do we want to make sure our floors are ready to resist them.

Total Flooring Solutions

Choosing the right accessories is the best way to integrate your floor into the interior you've created. At Pergo all our accessories are designed inhouse to guarantee a 100% compatibility and colour match with the Pergo floor you've chosen.

In addition to an extensive range of underlays, wallbases and other components, we also offer a customization service for heavy duty profiles, guiding you through everything from technical top-performing products to aesthetic finishing solutions.

Free samples

Pergo samples allow you to get a better feel of the product or show your clients the different available design options to choose from. To help you do your job we made all our samples free to order for architects, contractors, building promoters and other professionals. You can order your free floor samples in laminate, vinyl or wood in a few clicks on our website:
